

Ranjan Sharma

ranjan.sh@hcltech.com

Mob – 98101 29805

Experience Summary:

- Having vast experience in Data management, Data Engineering and Data warehousing on Azure and AWS cloud environments.
- Developed applications using **Python for Azure Databricks - Airflow Computation management**
- Develop data analytic pipelines serving various needs such as ETL scheduled job, Analytics, business machine learning models, etc.
- Worked on all repository style monolith, micro-service and monorepo
- Hand on experience in Developing the application using **SOLID Principles** and **Design Patterns**.
- Experience in developing & managing **batch and stream process** data analytics.
- Good exposure to **Cloud Infrastructure** for multiple vendors such as AWS/Azure also via **RedHat Openshift**
- Hands on experience on cloud deployment and creating image (**Ubuntu, Alma Linux OS**) using **Docker, Kubernetes** and **Services**
- **Relevant data engineering experience of 4+ years with overall cloud experience of 6+ years and IT software experience of 15+ years as on 2025**

Software Proficiency

Application	: Data Engineering, Data warehouse, Real-time streaming data analytics, Pipelines Orchestration Azure Databricks / AWS Cloudformation, Airflow, Redhat Openshift - Multi Cloud Management,
Technology	: Development, Python - Pandas/PySpark/Numpy, Databases, Node
Frameworks	: Azure Databricks Airflow, Python, Pandas, Numpy, Pyspark, Node.js
Database	: OracleDb, PostgresDb, MongoDB, Redis, Dynamo DB, Cosmos Db
DevOps	: Docker, Kubernetes, Kafka, S3 bucket, Push Notification, Cloud Formation, Step Functions, Athena, Glue, Pub/Sub, YAML, Kinesis, Lambda, EMR, CloudWatch, Splunk, SonarQube, SNS, SQS, EKS, EBS, EFS,

Project Summary

Project : Vision Essential (Online E commerce Portal for Eye related products)
Duration : September 2024 to August 2025
Technologies : Python Airflow scheduling pipeline data jobs via Azure Databricks with pre-build activities on Azure DataFactory. Semistructured data types json/csv transformed with medical business rules from OracleDb and PostgresDB which can be used to train ML model to characterize diseases and other clinical data.

Client : Kaiser Permanente

Responsibilities

- To develop and maintain data enrichment workflows via Airflow scheduler jobs for activities and build pipelines from datafactory and databricks
- Involved in maintaining data flow through data injection using various data connectors for Postgres DB and Redis databases and passing enriched data for warehousing and ML model analytics

Achievements: Idea and implementation of two pro-active steps in period of 6 months:

- 24*7 circular development lifecycle between PST and IST timezone for development team
- Initiated closer sync up between QA and Dev team to reduce round about time during major releases such as Prod and UAT. This gives boost to completion time to higher priority bugs and reduce communication barriers among test and development teams

Project : EON Home

Duration : June to September 2024

Technologies : Python AWS Elastic search based data analytics services and data sanitization for Gen AI client. AWS cloudformation and step functions orchestration of jobs. Postgres and semi-structured pdf data input cleansing for GenAI training and feeding with new data.

Client : EON

Responsibilities

- To sanitize data and store to Elastic DB realtime from document sources at confluence for GEN AI
- Involved in maintaining data flow through Oracle, MongoDB and Redis databases

Project : Telstra Client Engagement

Duration : August 2023 to June 2024

Technologies : Python AWS based data analytics services and data sanitization for AI/ML processing. AWS Athena, Glue, S3, SQS, SNS, Dynamo DB, Cloud Formation, Step Functions, Kubernetes Yaml

Client : Telstra

Responsibilities

- To sanitize data from semi-structured and structured data sources like data lake of csv/xls/json file in zip packages, Cleaning, analysis and transform and store to Oracle for later analytics, interim db used Dynamo DB and Redis
- Involved in maintaining data flow through Oracle, MongoDB and Redis databases

Project : Engineering Workboard (Product scrubber and defect priority management)

Duration : November 2022 to August 2023

Technologies : Python web services and Azure batch pipeline data engineering services to transform data from csv/bigdata/excel files to Oracle DB using MongoDB, Redis for interim cache stages

Client : Cisco

Responsibilities

- To Design and develop the workflow services and support performs via pre prepared data via transformation pipelines.
- Involved in development of REST Web Services on day to day activities.

- Involved in maintaining data flow through Redhat Openshift Azure stack Oracle, MongoDB and Redis databases.

Achievements: Idea and implementation of two value creation ideas in period of 1 year:

- Docker deployment image hardening to strengthen security over Azure deployment stack
- Auto API failure detection and troubleshoot system

Project : **Mitel Cloudlink-SDK** (Cloud SDK backend for all type clients)

Duration : 2020 to October 2022

Technologies : YAML DOCKER and Kubernetes via Helm for AWS cloud services

Client : Mitel

Responsibilities

- To enhance the durability of API created in SDK
- To support the system team in deployment activities.

Achievements: Idea and implementation of two value creation ideas in period of 1 year:

- Parallel execution of application using multiple-threading CPU cores of machine
- Serial execution improvement for reducing initial time consumed to complete startup activities for micro-services

Project : **PGI GlobalMeet SDK API** (Cloud SDK backend for all clients)

Duration : 2019

Technologies : Python, React JS, Azure Kubernetes via helm yaml for distributed deployment, Azure Cosmos DB, Oracle DB,

Client : PGI GlobalMeet

Responsibilities

- To develop the system using AWS SAM serverless framework.
- To implement and enhance the security of the lambda

Project : **Mitel NextGen** (API, socket and server distribution for different platforms)

Duration : 2017 to 2018

Technologies : Node.js, Express Framework, Sequelize Framework, PostgreSQL AWS cloud stack

Client : Mitel

Responsibilities

- Involved in improving quality for sdk by adding new features, enhancement. Testing functionality using Mocha.js, unit testing, etc.
- Involved in manual testing of developed features for quality assurance.

Achievements: Idea proposed, not implemented because of bad cloud translation API quality

- Global translation of chat messages among users from different region
- On need themes based on request from client also including dark theme

Project : **Mitel AWW and MiShare hybrid platform client** (Video/Audio sharing buffer protocol API)

Duration : March 2016 to 2017

Achievements: Idea and implementation of two value creation ideas in 9 months period:

- File management improvement for logs generated while session
- File size improvement for faster application distribution to clients
- Upgradation of node build library webpack for faster and more secure deliveries

Technologies:

- Node js and Angular framework full-stack
- Webpack, linting, code standards, agile workflow, git source control

Experience Details as per Technologies:

- Azure: 3+ years
- AWS: 5 years
- Python: 5+years
- Databases Oracle/Postgres/Mysql/Mongo/Redis: 15+ years
- Node.js: 8 years
- Hybrid Mobile Application for Android/iOS/Mac/Windows: 6 years

Extra Qualification:

- **RDBMS** and IT Fundamentals from NIIT
- **MCSE and CCNA** certification training, Diploma in Hardware and Networking from ASET (New Delhi)

Professional Certifications and Training Completed:

- 2024 Assessment for: US Healthcare overview, Hipaa compliance, Electronic Medical Health records, Healthcare Interoperability, US Healthcare providers, Physician payments sunshine act overview 2024
- 2023 Assessments for: Business Aligned Framework (BAF) Overview 2023, Six Sigma and Lean 2023, LP Requirement Development 2023, LP Matrics 2023, LP_Risk & Opportunity Management 2023
- **Performance Management 2022**, Telecom Basics 2020, CMMI 2.0 2020, HIPPA Security 2020
- **Core PMI 2017, Agile Foundation 2017, ERS-EXA Lead and Technical Manager - PM Track – Pre-assessment 2017**
- **Delivery Management(DQI) and Metrics Portal training(PM/PMO) 2017**, Network Management Software Assessment 2017
- **Behavioral JBC Track 2016, Information Security 2016, Need a Systematic Approach 2016, Python Basic and Indeterminate 2016**

Academic Qualification

- BCA
- MBA Marketing

From IGNOU, Rajghat, New Delhi

From IGNOU, Rajghat, New Delhi

I hereby declare that all the above details are true to the best of my knowledge and belief.

Place: New Delhi
